Exposure zones:
Product and product finish should be specified based on NZS3604:2011 durability zones & reference to AS/NZS 2728:2013 for the appropriate Environmental Category in which the project is situated:

NZS3604:2011 Exposure zones (refer to maps):

- Zone B- Low - Inland areas with little risk from wind-blown sea-spray salt deposits.
- Zone C- Medium - Inland Coastal areas with medium risk from wind-blown sea-spray salt deposits.
- Zone D – High - Coastal areas with high risk of wind-blown sea-spray salt deposits. Defined as within 500 metres of the sea including harbours, or 100 metres from tidal estuaries and sheltered inlets. Includes nominated offshore islands.

NOTE:
For installation specifications for designated cyclonic areas i.e. Regions C and greater it is also advisable to consult both your building engineer and your local Monier Roofing office.

Select the appropriate Exposure Zone below

2.2.1 Exposure Zones B

Exposure Zones B
Supply and install Terracotta Interlocking Roofing Tiles, as selected complete with accessories, as a Roof Cladding to the roofs identified on the drawings. All aspects of this work shall be in complete accordance with CSR Monier specifications and technical manuals, NZS 4206, other relevant product manufacturers' recommendations, and as shown on the drawings.

2.2.2 Exposure Zones C

Exposure Zones C
Supply and install Terracotta Interlocking Roofing Tiles, as selected complete with accessories, as a Roof Cladding to the roofs identified on the drawings. All aspects of this work shall be in complete accordance with CSR Monier Manufacturer's specifications and technical manuals, NZS 4206, other relevant product manufacturers' recommendations, and as shown on the drawings.

2.2.3 Exposure Zones D

Exposure Zones D
Supply and install Terracotta Interlocking Roofing Tiles, as selected complete with accessories, as a Roof Cladding to the roofs identified on the drawings. All aspects of this work shall be in complete accordance with CSR Monier specifications and technical manuals, NZS 4206, other relevant product manufacturers' recommendations, and as shown on the drawings. It is advisable to consult a building engineer and your local Monier Roofing office.
